What this Rating means

The 'Recommended' rating indicates that Lonsec has strong conviction the financial product can generate risk adjusted returns in line with relevant objectives. The financial product is considered an appropriate entry point to this asset class or strategy.

Strengths

- The Trust is managed by an experienced and well-led investment team.
- Increased breadth of resources and tools in particular manager research, asset allocation, performance analytics, governance and implementation teams.
- The Manager implements a robust and consistently applied investment process underpinning underlying manager selection and portfolio construction functions.
- Integration of the broader investment team has been progressing well to further enhance the Manager's investment capabilities.

Weaknesses

- The Trust has underperformed its benchmark and peers over the medium and longer term.

Fund Risk Characteristics

Fee BIometrics are a function of expected total fee as a percentage of expected total return.

What is this Fund?

- The OptiMix Wholesale Australian Share Trust (the 'Trust') is an active, multi manager, Australian equity strategy which invests in a selection of specialist Australian equities fund managers. The Trust is a direct look-through to the IOOF Multiseries Australian Shares Trust. The Trust's internal objective is to outperform the S&P/ASX 300 Accumulation Index by more than 1.5% p.a. (gross of fees) over rolling five-year periods.
- OnePath Funds Management Limited (the 'Manager') is part of the group of companies and related bodies comprising Insignia Financial Limited. The Trust is managed by the IOOF investment team. IOOF adopts a Multi-Manager investment style, taking an active approach. IOOF's investment philosophy is guided by a number of key principles which have foundations in academic research; active managers can outperform sector benchmarks over the long-term, in-depth research and analysis can provide superior insight and provide the potential for outperformance, and investment style can have a significant impact on performance.
- The Trust is currently a direct look-through to the IOOF Muliseries Australian Shares Trust and as such bears no resemblance in process or positioning
- The Manager seeks to generate returns through active manager selection and aims to blend a range of investment styles (value, growth, quality, momentum, income) while maintaining meaningful active stock and sector positioning.
- IOOF also has a preference for high conviction boutique managers and those with relatively low growth in funds under management (FUM). IOOF seeks to identify high-quality managers early on in their lifecycle, with a strong alignment of interests between investment staff and end investors.
- The Trust's PDS dated 30 September 2022 disclosed the Annual Fees and Cost ('AFC') totaling 1.05% p.a.. This value comprises (1) Management Fees and Costs of 0.93% p.a., (2) Performance Fee of 0.0% p.a., and (3) Net Transaction Costs of 0.12% p.a. In-line with RG97, some fees and costs have been estimated by the issuer on a reasonable basis. Actual fees and costs may vary to these estimates.
- The Trust charges buy/sell spread set at 0.07%/0.08%. These spreads can be subject to change, most notably during periods of market volatility, and can be sourced from the Manager's website.

Using this Fund

This is General Advice only and should be read in conjunction with the Disclaimer, Disclosure and Warning on the final page.

- Lonsec notes that the Manager has produced a Target Market Determination (TMD) which forms part of its design and distribution arrangements for the Trust. Lonsec has sighted the TMD that has been provided by the Manager and notes that this should be referred to for further details on the Target Market Summary Description of Target Market and Review Triggers.
- The Trust is a 100% growth-based portfolio with no exposure to income assets. It has a strong emphasis on maximising capital growth over the long-term. Investors should expect high short-term fluctuations in values and a higher chance of capital loss. However, they are prepared to accept this as a trade off in achieving their long-term investment objective.

Suggested Lonsec risk profile suitability

For guidance on appropriate asset allocations and risk profiles, refer to the latest Lonsec Strategic Asset Allocation Review and Risk Profile Definitions on our website.

Changes Since Previous Lonsec Review

- Effective July 2022, Dan Farmer was appointed as the Chief Investment Officer ('CIO') for the combined heritage IOOF, MLC and OnePath multi-manager businesses. The investment team is structured with responsibilities broadly segmented by Portfolio Construction, Portfolio Enablement and Special Capabilities functions. A number of team member responsibilities will be transitioned in a measured way over time.
- In June 2022, James Tayler was appointed as Head of Responsible Investment.
- In August 2022, Myooran Mahalingam resigned from the Manager and Liam Wilson took over as Portfolio Manager for the MLC Global Equities portfolios, in addition to already being the PM for IOOF and OptiMix Global Equities portfolios.
- There have been additional investment team changes effective 12 September 2022 which include:
 - Paul Crisci departed the Manager and Peter Sumner was appointed as Portfolio Manager for the Australian Equities and A-REIT portfolios;
 - Simon Elimelakh, Head of Investment Portfolio Analytics, transitioned to a contracting role. Furthermore, the analysts previously reporting through to Elimelakh now report to Daniel Ackland, Investment Analytics Manager;
 - David Djukanovic, Head of Exposure Management and Trading, leads a team of five including Head of Derivatives, Clifford Bayne, who reports directly to Djukanovic.
- In January 2023, Insignia Financial entered into a binding share sale agreement to divest its remaining 45% equity stake in JANA to JANA's management team. JANA would become a wholly management-owned business following the transaction. The completion of this transaction is expected to occur in early 2023. Lonsec notes, no changes in terms of JANA asset consulting services provided to the investment team.

ANALYST: ISRIN KHOR | APPROVED BY: ALEC LEUNG

Lonsec Opinion of this Fund

People and resources

- Insignia Financial Limited ('Insignia Financial', ASX code: IFL) is a leading provider of wealth management services including superannuation, platform administration and investment management, with over \$285.1bn assets under management and administration as 31 December 2022. Following the completion of the acquisition of MLC Wealth ('MLC') from National Australian Bank (ASX Code: NAB) in May 2021, Lonsec believes there are meaningful synergies realised from the breadth of resources, investment and risk management tools and significant collective industry experience of the combined businesses. The investment team members continue to collaborate effectively to manage their respective products.
- Effective 4 July 2022, Dan Farmer was appointed as the Chief Investment Officer ('CIO') for the combined heritage IOOF, OnePath and MLC multi-manager businesses. Lonsec believes that Farmer possesses the appropriate experience and skillset to lead the team and has skilfully navigated the significant changes arising from the MLC/Insignia Financial Ltd merger. Farmer previously was CIO of the IOOF investment management division and prior to this role, he was the Portfolio Manager for the Australian equities portfolios. Prior to joining the Insignia Financial, Farmer was Senior Executive Investments at Telstra Super. Furthermore, succession planning efforts also saw the appointment of Stanley Yeo as Deputy CIO and Head of Equities in 2021. Moreover and subsequent to the investment team restructure occurring in 2022, Yeo was appointed to Head of Strategy and Equities. The Trust is managed by Portfolio Manager, Australian Equities, Peter Sumner. In light of the integration process, Sumner was appointed in September 2022 after the departure of the previous portfolio manager Paul Crisci.
- Lonsec considers recently appointed lead Portfolio Manager, Peter Sumner to be suitably qualified and adept at managing the Trust given his substantial experience in Australian equities strategies. Sumner has over three decades of experience in the investment industry having held various portfolio management roles across several asset classes including Portfolio Manager of Australian Equities for the MLC suite of products since 2008. Sumner is also responsible for the A-REIT portfolios within the organisation. Lonsec considers Sumner to exhibit a high degree of awareness concerning risk constraints and seeking out opportunities that offer additional alpha without compromising on quality. Yeo, as Head of Strategy and Equities, is the backup Portfolio Manager and has a wealth of experience and oversight of the strategy alongside Farmer who also previously managed this strategy as Portfolio Manager.
- The team is well-resourced consisting of 46 people in total, including Farmer and Yeo. The investment team has been recently restructured with responsibilities broadly segmented by Portfolio Construction, Portfolio Enablement and Special Capabilities functions. A number of team members' responsibilities will be transitioned in a measured way over time. While the senior team member

departures are disappointing, Lonsec believes the reporting lines, roles and responsibilities remain clearly defined under the current structure with team integration progressing well.

- Lonsec views key person risk associated with Sumner as low to moderate given the support and backup structure implemented.
- Lonsec considers the alignment of interest to investors to be moderate. 60% of the remuneration of the investment teams is directly linked to the performance of the multi-manager range of funds, which is heavily weighted to three and five year returns and can be taken as cash, salary sacrifice to superannuation or a combination of the above. The bonuses have a deferral component which promotes further alignment across the team.

Research and portfolio construction

- Overall, Lonsec considers the manager research process to be detailed and transparent. The Manager's research process integrates both quantitative and qualitative factors. The quantitative process is used to establish specific risk/return objectives at both the Trust and sector level and also to assist in screening, modelling and identifying managers that in aggregate have the attributes to construct a blended portfolio to meet a specific return and risk target.
- The Manager's research process aims to establish a narrow universe of managers that have been filtered by various criteria including the team's house views on suitable styles of managers for given asset classes. The Manager utilises the services of an external asset consultant, Mercer, when formulating individual strategies, and ad-hoc advice in strategic asset allocation and strategic tilting. Lonsec views Mercer is well-equipped to provide guidance and advice to the team. Combined with the team's sector specialist model, Mercer's MRB has allowed the Manager to undertake research across a broader range of underlying managers and strategies. While Lonsec has a positive view of the depth and breadth of Mercer's domestic and global manager coverage, Lonsec is seeking stability at Mercer following an increased turnover within Mercer's Manager Research Boutique (MRB) over recent years.
- Furthermore, Lonsec notes the investment team also has access to the asset consulting services of JANA. As the broader team integration continues to progress, Lonsec will be better able to assess JANA's input in the Manager's investment process. Lonsec will continue to monitor the team's relationship with JANA in future reviews following the binding share sale agreement to divest Insignia Financial's remaining 45% equity stake in JANA to JANA's management team.
- In constructing the portfolio, Lonsec believes IOOF takes appropriate levels of activeness to achieve the Trust's objective. The Manager has a deliberate smaller market capitalisation bias and allocation to non-traditional or niche strategies which may result in performance that differs substantially from peers and benchmark over an investment cycle.
- IOOF has displayed strong discipline in removing underperforming or unsuitable strategies from the

OptiMix Wholesale Australian Share Trust — Class A

ISSUE DATE 18-04-2023

Trust as and when the need arises. Pleasingly, this discipline has been applied equally to both external and internal strategies.

- Pleasingly, IOOF has a well-developed list of designated backup managers in the event of an adverse scenario eventuating (i.e., key Portfolio Manager departing). Lonsec looks favourably on multi-manager strategies having well-formulated contingency plans, believing it to be consistent with industry 'best practice'.

ESG Integration

- Lonsec's ESG integration assessment considers how rigorous, robust and structured the ESG process for the Trust is as well as how well it integrates into the overall investment process and the Manager's overall policy and reporting framework. The assessment is not intended to assess the underlying holdings of the Trust's portfolio or the Manager's adherence to any form of impact, green / sustainable or ethical standards.
- At the corporate level Lonsec views the Manager's overall ESG policy framework and disclosure as lagging peers. The Manager has an articulated commitment to their integration of ESG within their investment process with evidence in their public positioning and policy framework. The Responsible Investment policy together with the proxy voting policy is freely available on the firm's website. The level of disclosure with respect to the proxy voting policy and outcomes is slightly behind peers. The proxy voting policy lacks depth compared to peers and reporting on voting outcomes is publicly available, although rationales for dissenting votes is not provided. The engagement approach is explained within the Responsible Investment policy, however, is considered generic compared to peers. No reporting on engagement outcomes is publicly available.
- The Manager has indicated that their Responsible Investment style is "ESG Integration" and as such that they take Environmental, Social and Governance factors into consideration when assessing investment opportunities. With a primary ESG style of "Stewardship" Managers will usually focus their ESG strategy on Engagement and Voting as the key tool in managing their ESG risks. While stewardship approaches are common across most Managers, they can form the key ESG strategy employed by some Managers. Due to the qualitative nature of this style Lonsec highlights the need for Managers to provide clear and detailed reporting on both engagement and voting activities and recommends investors review the Trust's stewardship reporting where available.
- Lonsec's review of ESG integration for Multi Asset Funds such as this, reviews only the ESG components of the selection of underlying strategies or managers. It does not review the ESG integration at the level of each of the underlying funds or strategies.
- The Manager clearly incorporates an ESG element in their manager selection process. Managers must have ESG policies in place and adhere to other minimum ESG based investment standards. Documentation requirements are appropriate. While there is no monitoring of the ESG characteristics of the underlying stocks performed, ongoing monitoring of the policies of the underlying managers is performed

on at least an annual basis. Proxy voting is delegated to the underlying Managers however no clear voting guidelines on how that voting should be considered is issued by the Manager.

- There are no signs that company engagement on ESG issues is a component of the Manager's current investment approach for this Fund.
- While ESG does not form a component of the Managers broader compliance framework, Lonsec looks very favourable on the level of transparency the Manager provides into portfolio holdings. Voting on the Trust is not controlled by the Manager limiting the Trust's ability to vote in alignment with its own analysts views or investment/sustainability priorities.
- In June 2022, James Tayler was appointed as Head of Responsible Investment. Lonsec expects Tayler's appointment to expand the scope of the Manager's ESG integration through time.

Risk management

- Lonsec has been satisfied with the structure of the risk management functions embedded within the investment process. While continually evolving, the Manager has integrated compliance systems that enable underlying mandates to be implemented to ensure compliance with their predefined guidelines.
- Underlying managers are typically accessed via separately managed accounts enabling IOOF to tailor mandates to its requirements, e.g., maximum stock bet limits or maximum cash holdings. Lonsec considers this a positive structure as it can facilitate tighter portfolio construction, better product design control, the opportunity for better pricing, improved tax efficiency for investors, and the ability to manage implementation and transitions more efficiently.
- IOOF closely monitors manager portfolios and weightings on a daily basis and investigates daily any excess return outliers exceeding the 99% confidence level. In Lonsec's opinion, ongoing mandate monitoring is very important within the Multi-Manager structure, as it is just as critical for underlying managers to be adhering to their investment process as it is that the process is of high quality.
- The Product Operational Accounting and the Office of the Responsible Entity undertake operational due diligence on potential investment managers and undertake annual reviews of the operational risks associated with employed managers. Lonsec views this positively as it reduces the workload of Portfolio Managers and improves specialisation.
- The team is continuing to improve the transparency of the underlying portfolios and has added these portfolios into Bloomberg PORT and FactSet.

Fees

- The Trust's fee comprises of management fee of 0.93% p.a., an estimated performance fee of 0.0% p.a., and net transaction costs of 0.12% p.a. Lonsec considers the total fee load for the Trust (AFC of 1.05% p.a.) as moderate relative to peers.

Product

- The Trust is a relatively vanilla Australian equity multi-manager strategy. Hence Lonsec does not consider it to be operationally challenging to

ANALYST: ISRIN KHOR | APPROVED BY: ALEC LEUNG

P 4-10

OptiMix Wholesale Australian Share Trust — Class A

ISSUE DATE 18-04-2023

implement. Additionally, the Manager employs high quality 'tier 1' service providers.

- The Trust is a registered managed investment scheme (MIS) for which Onepath Funds Management Limited (the 'RE'), a related entity. The RE is responsible for operating and managing the MIS, holds an AFSL and as such is required to comply with its AFSL and RE obligations as outlined under the Corporations Act. Lonsec notes the RE has built experience in operating and managing a number of schemes over an extended period of time.
- The Trust has been in outflow over the short-to-medium term which heightens the potential for wind-up risk if this trend was to materially accelerate. That said, Lonsec acknowledges that the Trust is already large scale with the Manager remaining fully committed to this product.

Performance

- The objective of the Trust is to outperform the S&P/ASX 300 Accumulation Index (the 'Benchmark') before fees over rolling five-year periods by 1.5%.
- To 28 February 2023, the Trust delivered total returns, net of fees of 7.3% p.a. and 6.1% p.a., over three and five years, respectively, underperforming both the benchmark and Lonsec median peer group. As such, the Trust has not met its investment objective.
- During these periods, the Trust's volatility (as measured by the annualised standard deviation) was broadly in line with the peer group median. The maximum drawdown was broadly in line with the peer median over both periods.
- The Trust's returns and annualised standard deviation have resulted in a Sharpe Ratio that was broadly in line with the peer median.

Overall

- Lonsec has maintained the Trust's **'Recommended'** rating at its recent review. The rating reflects the high regard and conviction for the experience and calibre of the broader investment team. Further, lead Portfolio Manager, Peter Sumner is considered sufficiently skilled and experienced to manage the Trust effectively. The rating is also underpinned by Lonsec's positive view of the Trust's robust and repeatable investment process. The increased resourcing from the combined heritage IOOF, OnePath and MLC businesses, provides further depth of expertise within investment management, asset allocation and risk management.
- Lonsec believes the Trust encompasses a differentiated feature in its willingness to back boutique investment managers early in their lifecycle, and the usage of small, micro-cap and more niche strategies such as health care funds. However, Lonsec highlights that the Trust has underperformed its benchmark and peers over the medium and longer term.

People and Resources

Corporate overview

Insignia Financial Ltd ('Insignia Financial') is a wealth management company offering products and services across, financial advice and distribution, portfolio and estate administration, and investment management.

Insignia Financial is listed on the Australian Stock Exchange ('ASX'). As of 31 December 2022, Insignia Financial had \$285.1bn in Funds Under Management and Administration.

These services are operated through a suite of brands including IOOF, Shadforth, Lonsdale, Bridges Financial Services, Consultum Financial Advisers, M3 Financial Services and RI Advice.

Size and experience

NAME	POSITION	EXPERIENCE INDUSTRY / FIRM
DANIEL FARMER	CIO	27 / 13
PETER SUMNER*	PORTFOLIO MANAGER, AUSTRALIAN EQUITIES	34 / 34
STANLEY YEO#	HEAD OF STRATEGY AND EQUITIES	23 / 13

* Lead Portfolio Manager# Primary back-up

The Investment Team is structured along specialist lines. Peter Sumner was appointed Portfolio Manager, Australian Equities and A-REITs in September 2022 as a result of the MLC merger and broader investment team restructuring. Sumner possesses 34 years of experience, having worked across fixed income and equity portfolio management roles throughout his tenure at MLC. In particular, Sumner has been Portfolio Manager, Australian Equities since 2008 at MLC. Yeo, as Head of Strategy and Equities, is the backup Portfolio Manager and has oversight of the strategy alongside Farmer (CIO), who also previously managed this strategy as Portfolio Manager.

In total, the investment team consists of 46 personnel across several specialised asset classes and functions. The senior members of the investment team comprise an average of 25 years of industry experience. The Team is led by CIO, Dan Farmer. The team comprises broad functions encompassing Portfolio Construction, Portfolio Enablement & Special Capabilities.

The Portfolio Manager conducts qualitative and quantitative research and provides overall data support and recommendations to the five-member Investment Management Committee ('IMC'). The IMC ultimately considers and approves asset allocation decisions and manager appointments.

The IMC meets bi-monthly or more frequently if required, and comprises Anthony Hodges (Chairman and External Member), Denise Allen, and Mary-Anne Nunan (External Members), Daniel Farmer (CIO) and Stanley Yeo (Head of Strategy and Equities). Osvaldo Acosta (Head of Fixed Interest Assets) has been appointed as Secretary.

Back-office functions are performed by IOOF's Investment Operations Team. Compliance monitoring, custody, unit pricing, registry, and financial reporting functions are outsourced to various parties including Insignia Financial and JP Morgan; while transition management and implementation are performed by a

ANALYST: ISRIN KHOR | APPROVED BY: ALEC LEUNG

OptiMix Wholesale Australian Share Trust — Class A

ISSUE DATE 18-04-2023

panel of transition managers including Citi, Macquarie, UBS, and State Street.

Remuneration

The investment team is rewarded with a combination of base salary and variable bonus. Remuneration of the investment teams is directly linked to the performance of the multi-manager range of funds. Typically, 60% of a team member's variable remuneration is linked to the performance of the funds with 20% linked to broader product development initiatives and the remaining 20% related to behaviours and risk metrics. Variable remuneration is heavily weighted to longer-term performance, with 85% based on three and five year returns, and can be taken as cash, salary sacrifice to superannuation or a combination of the above.

Asset Consultant

IOOF appointed Mercer as its primary external asset consultant in July 2017 and MLC has a long standing relationship with JANA (JANA was previously a fully owned subsidiary of NAB. Insignia Financial Ltd sold its remaining minority share to JANA in January 2023). Post IOOF's acquisition of MLC, the broader Insignia Financial multi manager business benefit from consultancy and research services provided by both Mercer and JANA. These services include manager research and consultancy services when performing due diligence on prospective and currently appointed underlying managers, designing neutral benchmarks, stress testing, strategic tilting advice and performing various other risk management functions.

In addition to Mercer and Jana, Neuberger Berman assists in Alternative's research. Neuberger Berman is an 80-year old private employee-owned investment manager. The firm manages equities, fixed income, private equity and hedge fund portfolios for institutions and advisors. With offices in 36 cities worldwide, Neuberger Berman's team employs more than 2,400 professionals and manages more than US\$402bn in assets under management as at December 2021.

Research Approach

Overview

RESEARCH PHILOSOPHY	BLENDED QUALITATIVE AND QUANTITATIVE RESEARCH
TARGET MANAGER	HIGH QUALITY BETA AND ALPHA MANAGERS, BOTH ESTABLISHED AND BOUTIQUE.
NO. OF MANAGERS IN UNIVERSE	UNLIMITED
NO. OF MANAGERS ACTIVELY RESEARCHED	ALL MANAGERS RESEARCHED BY MERCER
RESEARCH INPUTS	VARIOUS – MANAGER MEETINGS, ASSET CONSULTANT ETC.

IOOF's integrated quantitative and qualitative investment process aims to establish a narrow universe of funds that have been filtered by various criteria including IOOF's house views on suitable styles of managers for given asset classes and managers rated highly by Mercer. Qualitative research then focuses on the firm's background and history, the key people and resources, investment style and strategy, portfolio construction, and constraints.

Screening of Managers

IOOF places a strong emphasis on active risk budgeting when in the Portfolio Construction process, and therefore identifies the type of managers/mandates

required to fulfill particular roles within the available tracking error budget. As such, managers who would be unlikely to fulfill a certain role within the portfolio will be screened out. This approach allows IOOF to minimize the universe of products to a manageable size rather than considering all available managers in each asset class. For example, IOOF's house view on Australian equities is that well-resourced active managers, with a strong alignment of interest between investment staff and investors with relatively low funds under management, are most likely to outperform, and so will dedicate the research effort to these types of managers as opposed to the entire Australian equity universe.

IOOF also has access to Mercer's Global Investment Manager Database ('GIMD') to enhance the scope of their research capability and as an additional tool for filtering to identify the most suitable funds. GIMD is an online database that encapsulates information ranging from manager research notes, historical performance statistics, ideas emerging in other markets, and economic research on approximately 5,300 managers and 26,000 funds.

Typically, IOOF will focus its research on managers rated B+ or higher by Mercer. However, the discovery of managers may be sourced through any source including Mercer, directly by IOOF, through existing networks and contacts with other industry participants, such as managers, consultants or superannuation plan operators. The IOOF investment team are encouraged to have a wide opportunity set for investment ideas.

Research focus

The list of potential managers identified as research priorities by the screening process will then be subject to additional research by the IOOF team before they can be included in a portfolio. This 'double' layer of manager research typically ensures that final funds in the portfolios have undergone a rigorous review process.

IOOF undertakes a mix of both qualitative and quantitative research. From a qualitative perspective, IOOF considers factors such as the firm's background and history, financial position, the calibre of key decision-makers and the depth of available resources, investment strategy and style, idea generation and portfolio construction processes, and implementation constraints. The types of quantitative analysis conducted will include various types of performance, return and style-based analytics, various types of portfolio holdings-based attribution, and risk factor analytics.

Portfolio Construction

Overview

BENCHMARK	S&P/ASX 300 ACCUMULATION INDEX
RETURN OBJECTIVE (INTERNAL)	BENCHMARK PLUS 2.0% (BEFORE FEES) OVER ROLLING FIVE-YEAR
RISK OBJECTIVE (INTERNAL)	< 3% P.A. TRACKING ERROR OVER FIVE YEARS
INVESTMENT STYLE	MULTI-MANAGER
MARKET CAPITALISATION BIAS	SMALL TO MID-CAP
EXPECTED ACTIVE SHARE	45%

ANALYST: ISRIN KHOR | APPROVED BY: ALEC LEUNG

IOOF's primary objective with respect to the determination of manager weightings is to achieve a style-neutral portfolio free from any undesired systematic style, capitalisation, or other factor biases relative to the relevant benchmark. Manager weightings are also determined via an assessment of contribution to total active risk to ensure no one manager has a disproportionate expected contribution. However, a manager's contribution to total active risk is not considered in isolation but with reference to the correlation of its excess returns with other managers and the objective of the product.

To summarise the actual portfolio construction process, in the first instance, active risk and return targets are set for the Trust's risk profile. The tracking error or risk budget is then apportioned between allowable asset classes based on IOOF's house views of the available risks and opportunities. Finally, managers are selected and blended to fill the risk budget, with each manager's contribution to risk being commensurate with their expected contribution to the alpha target. The number and style of managers within each asset class are also pre-determined according to IOOF's house view.

Manager blending is conducted following both qualitative and quantitative assessments. The qualitative analysis includes a comparative analysis of each manager, and the diversification benefits they offer. Quantitative analysis includes factors such as correlation, historical returns, style biases, capitalisation analysis, regression analysis, and various risk analytics. Prior to submitting a manager recommendation to the IMC, the recommendation is peer-reviewed by the Investment Manager Peer Review Group. This group consists of senior investment professionals (Chief Investment Officer and Portfolio Managers) that are ultimately responsible for the review of manager proposals before being formally considered by the IMC. This ensures any manager proposal to the IMC has been rigorously peer-reviewed as a means of quality control and to minimise individual bias and subjectivity. It is also a means to consider the manager's proposal in a total portfolio context.

The following summarises the underlying managers within the Trust as of 31 December 2022. Consistent with IOOF's aim of broad style neutrality, there is a selection of managers with varying investment styles.

- AllianceBernstein (concentrated value)
- Acadian (small companies)
- The Northern Trust (Quantitative multi-factor)
- Quest (Fundamental Quality & Growth)
- Northcape (Quality)
- IOOF QuantPlus (enhanced passive)

Risk Management

Risk limits

SEPARATE RISK MONITORING	YES
CASH LIMIT	10%

All underlying managers are subject to constraints as specified in an investment management agreement. Most underlying managers are accessed via separately managed accounts. This enables IOOF to tailor mandates to its requirements, for example, maximum stock exposure limits or maximum cash holdings.

The risk tools employed by IOOF include Bloomberg, Factset, and BARRA. Risk analysis is also completed by Mercer, whenever a change to the portfolio is proposed.

Risk monitoring

The IOOF investment manager monitoring process consists of a number of prescribed stages. This includes the review of monthly investment reports, review of quarterly manager questionnaires, formal quarterly manager interviews, quarterly manager review notes, ongoing quantitative performance analytics, and ongoing review of external research. Quarterly Manager Questionnaires cover not only risk and performance but also any changes or developments in people or processes. Formal manager interviews (and site visits where practical) are also conducted on an ad-hoc basis where required.

Manager weightings are monitored on a daily basis and are rebalanced on an ongoing basis using cashflows. Using cashflows in this way means that active rebalancing of the portfolio is rarely required which minimises turnover and transaction costs/tax implications.

Product Operational Accounting and the Office of the Responsible Entity works with the Investment Team to review and assess the operational capabilities of all manager appointments.

This team also monitors, reviews and assesses the operational risks associated with employed Investment Managers on an annual basis.

Operational due diligence includes a review of the systems, policies, processes and resources managers have in place to monitor and manage operational risk exposures. Reviews typically focus on the below areas:

- Professional indemnity insurance
- Auditing Practices (with reference to GS007 requirements)
- Organisational structures
- Business Continuity Management
- Policy Summaries
- Risk Management Approaches
- Investment Compliance
- Breaches & Incidents

Implementation

Portfolio allocations are monitored daily and re-balanced as necessary (subject to a tolerance range of +/-3% at the asset class level and +/-5% at the manager level). Cashflows are actively used to rebalance the portfolio on an ongoing basis, so the tolerance bands are rarely breached. Cashflows are allocated using a proprietary cashflow management system which allows for straight through processing to underlying investment managers.

External transition managers are appointed from a panel at 'arm's length' to ensure that objectivity is maintained. Custody, unit pricing, registry and financial reporting functions are outsourced to various parties including IOOF and JP Morgan.

Risks

An investment in the Trust carries a number of standard investment risks associated with investment markets. These include economic, market, political, legal, tax and regulatory risks. Investors should read the PDS before making a decision to invest or not invest. Lonsec considers the major risks to be:

Market risk

Investment returns are influenced by the performance of the market as a whole. This means that your investments can be affected by things like changes in interest rates, investor sentiment and global events, depending on which markets or asset classes you invest in and the timeframe you are considering.

Security and investment-specific risk

Within each asset class and each fund, individual securities like mortgages, shares, fixed interest securities or hybrid securities can be affected by risks that are specific to that investment or that security. For example, the value of a company's shares can be influenced by changes in company management, its business environment or profitability. These risks can also impact the company's ability to repay its debt.

Derivatives

The manager has scope, via their PDS, to implement various derivative strategies with the objective of mitigating equity market risks. Lonsec does not expect this to be a widely adopted strategy.

The value of a derivative will generally move according to movements in the underlying asset, and therefore carries the risks associated with that asset. There is also the risk of potentially magnifying gains or losses through the use of derivatives. In addition to this there is potential illiquidity of the derivative. The Trust's derivative positions are constantly governed by a strict internal risk management process to monitor any exposures derived from the implementation of derivatives.

Other risks

Please refer to the Trust's PDS for more details on items identified by the Responsible Entity and Manager including Liquidity Risk, Counterparty Risk, Legal and Regulatory Risk.

OptiMix Wholesale Australian Share Trust — Class A

Glossary

Total return ‘Top line’ actual return, after fees
Excess return Return in excess of the benchmark return
Standard deviation Volatility of monthly Absolute Returns
Tracking error Volatility of monthly Excess Returns against the benchmark (the Standard Deviation of monthly Excess Returns)
Sharpe ratio Absolute reward for absolute risk taken (outperformance of the risk free return (Bank Bills) / Standard Deviation)
Information ratio Relative reward for relative risk taken (Excess Returns / Tracking Error)
Worst drawdown The worst cumulative loss (‘peak to trough’) experienced over the period assessed
Time to recovery The number of months taken to recover the Worst Drawdown
Snail Trail A trailing 12-month relative performance and relative risk measurement over the benchmark. The trail is generated using a 12-month rolling window over the specified period

About Lonsec

Lonsec Research Pty Ltd (Lonsec) is an investment research house with specialist areas of expertise, that was originally established in 1994 and the current entity was registered on 23 June 2011. From 1 July 2011, Lonsec became a fully owned subsidiary of Lonsec Fiscal Holdings Pty Ltd, a privately owned entity with a multi-brand strategy of providing leading financial services research and investment execution. Lonsec believes that professional financial advisers need informed opinions on the best investment strategies and financial products to provide real value for their clients. To meet this need, Lonsec has in place an experienced research team, which draws on a robust research process to undertake in-depth assessment of managed fund products.

Analyst Disclosure and Certification

Analyst remuneration is not linked to the research or rating outcome. Where financial products are mentioned, the Analyst(s) may hold the financial product(s) referred to in this document, but Lonsec considers such holdings not to be sufficiently material to compromise the rating or advice. Analyst holdings may change during the life of this document. The Analyst(s) certify that the views expressed in this document accurately reflect their personal, professional opinion about the matters and financial product(s) to which this document refers.

LONGSEC STRONGLY RECOMMENDS THIS DOCUMENT BE READ IN CONJUNCTION WITH THE RELEVANT PRODUCT DISCLOSURE STATEMENT. IMPORTANT NOTICE: Issued by Lonsec Research Pty Ltd ABN 11 151 658 561 AFSL 421 445 (Lonsec). Lonsec receives a fee from the fund manager or financial product issuer(s) for researching the financial product(s), using objective criteria and for services including research subscriptions. Lonsec’s fee is not linked to the rating(s) outcome. Lonsec Investment Solutions Pty Ltd ABN 95 608 837 583 CAR (CAR: 001236821) of Lonsec receives fees under separate arrangement for providing investment consulting advice to clients, which includes model portfolios, approved product lists and other financial advice and may receive fees from this fund manager or financial product issuer for providing investment consulting services.
