Strengths

- The Fund is managed by an experienced and well-led investment team.
- Increased breadth of resources and tools in particular manager research, asset allocation, performance analytics, governance and implementation teams.
- Robust and consistently applied investment process underpinning underlying manager selection and portfolio construction functions.
- Integration of the broader investment team has been progressing well to further enhance the Manager's investment capabilities.

Weaknesses

- The complexity of managing an extensive breadth of heritage products with varying objectives, but this is being managed by the continued alignment of asset class building blocks and objectives.

Product Opinion

The Fund has retained its 'Recommended rating' at the most recent review. The rating reflects the high regard and conviction for the experience and calibre of the broader investment team and the lead Portfolio Managers and the robust and repeatable investment process. The increased resourcing from the combined heritage IOOF, OnePath and MLC businesses, provides further depth of expertise within investment management, asset allocation and risk management. The complexity of managing an extensive breadth of heritage products with varying objectives is addressed by the continued alignment of asset class building blocks and objectives.

Who is the Team?

The broader MLC Asset Management Investment Team ('Investment Team') consists of 48 members in total with responsibilities broadly segmented by Portfolio Construction, Portfolio Enablement and Special Capabilities functions. The key decision makers responsible for asset allocation across all portfolios are supported by the Sector Portfolio Management ('SPM') team for sector-specific manager research, the Derivatives team and the Investment Portfolio Analytics team.

The Investment Management Committee ('IMC') is responsible for overseeing and approving all investment decisions in the Fund including inclusions and exclusions of underlying managers. The IMC comprises of Anthony Hodges (Chairman, External member), Denise Allen, Mary-Anne Nunan (external), Dan Farmer, Stanley Yeo and Osvaldo Acosta.

Lonsec Opinion

Skill

The senior team members including CIO Dan Farmer, are highly experienced and have the appropriate skillset to manage the multi-asset and single sector portfolios. There are meaningful synergies realised from the breadth of resources and significant collective industry experience of the combined businesses. The integration of the broader investment team has provided further depth of expertise within investment management, asset allocation and risk management capabilities.

Team Size

The Investment Team is well-resourced and is considered one of the largest teams compared to Lonsec peers. Resourcing has benefited from the combination of the heritage IOOF, OnePath and MLC businesses.

The Investment Team also leverages the research capabilities of its asset consultants which enhances the team's resourcing and provides support to the broader research offering.

Track Record/Co-Tenure

The senior members have long co-tenure at their respective heritage businesses. Although the co-tenure of the combined investment team is considered relatively short following the recent acquisitions, the team's integration has been progressing well with early encouraging signs of stability. Moreover, the combined heritage businesses can leverage the large scale and resourcing available to the investment team to assist in the transition process. The Investment Committee members have remained largely the same through the combinations and have a long co-tenure between them.

Alignment

The alignment of interest to investors is considered to be moderate and in line with peers. The majority of the remuneration is directly linked to the three to five year performance of the multi-manager range of funds, with a deferral component which promotes further alignment across the team.

Key Person Risk

Key person risk is considered to be low to moderate and centered primarily on the KDMs due to their extensive experience and leadership of investment strategies. Positively, the risk is partially mitigated by the team-based decision making approach and extensive resources and the utilisation of the deeply resourced asset consultant capabilities.

What is the Investment Process?

The Manager conducts a formal annual review of the strategic asset allocation ('SAA'). Having identified an asset allocation that broadly meets the Trust's objectives, scenario testing is applied to review performance under various macroeconomic conditions. The recent enhancements to the SAA framework incorporate non-normal distribution, upside and tail risk modelling and associated climate change impacts and continued refinement to the scenario testing capabilities.

The Fund further employs a dynamic asset allocation ('DAA') process, or 'Strategic Tilting' whereby occasional deviations from SAA can be made when markets are at extremes.

The Sector Portfolio Management ('SPM') team is responsible for conducting research with input from JANA and Mercer. This 'double' layer of manager research typically ensures that final funds in the portfolios have undergone a rigorous review process. The Manager undertakes a mix of both qualitative and quantitative research on managers. All investment proposals need to be approved by the Investment Committee.

Lonsec Opinion & Supporting Facts

Philosophy and Universe

Sector Exposure	Active
Available Universe	Cash and short-term securities, diversified fixed interest, property, Australian and International shares, alternatives defensive and alternatives growth.
Investment Style	Multi manager
Asset Allocation Approach	Strategic AA Dynamic AA

The fully diversified investment approach of combining high quality active managers and taking active risk in certain asset classes to provide optimal returns in the long term reflects their philosophy and risk and return objectives.

Research Process

Idea generation	Investment team, consultants, economic research
SAA review frequency	Annually
DAA/TAA signals	Investment cycle clock, Economic data, Valuation, Behavioural factors (sentiment, technical)
Managers actively tracked	0
External consultant	Mercer, JANA

The Manager implements a robust and consistently applied investment process underpinning manager selection and portfolio construction functions. The large size of the investment team provides depth to the Manager's process. The SAA process is reasonably intuitive and employs an active 'Strategic Tilting' framework, which is expected to improve the risk/return outcome for investors. The manager research process which considers both quantitative and qualitative factors is considered to be detailed and transparent.

The Manager utilises Mercer and JANA when formulating individual strategies, and ad-hoc advice in SAA, strategic tilting and stress testing, which adds rigour to the process. There are ongoing flow of ideas from the individual sector specialists who are responsible for constructing the individual sleeves of the portfolio, portfolio managers and their consultants, Mercer and JANA. The depth and breadth of Mercer and JANA's asset allocation capabilities and manager coverage are viewed positively. The Manager has access to sophisticated tools and systems to manage these multi-manager portfolios. The manager research process which combines both quantitative and qualitative factors, is detailed and transparent.

Portfolio Construction

Approach to benchmark	Benchmark aware
Typical number of managers	40-50
Use of unlisted assets	Yes
Allocation to related/affiliated exposure	Yes
Portfolio decision making	Team based
Targeted tracking error	1.5%-2.0%
Use of mandates	Yes
Use of alternatives	Yes

The Fund is considered adequately diversified given the breadth of asset classes and sources of alpha including unlisted assets and alternatives.

Underlying managers are typically accessed via separately managed accounts enabling the Manager to tailor mandates to its requirements. In addition, this structure can facilitate tighter portfolio construction, efficient implementation, better product design control, better pricing opportunity and improved tax efficiency for investors.

The manager employs a strong buy/sell discipline in manager selection where funds have undergone a rigorous review process by the MLC, Mercer and JANA investment teams and received approval from the IMC. The Manager has in the past demonstrated the willingness to terminate related capabilities where warranted.

Capacity Management

Although the firmwide FUM is considered large, Lonsec does not have any concerns in terms of capacity given the wide opportunity set for multi-asset strategies.

Investment Risk Management

Rebalancing bands	+/-3%
Max illiquid	30.00%
Monitoring external to investment team	Yes
Frequency of monitoring	Daily
Primary risk management system	FactSet and Barra
Security Limits (Min./Max.)	N/A
Gross exposure range	N/A

The structure of the risk management functions is well embedded within the investment process. While continually evolving, the Manager has integrated compliance systems that enable ongoing monitoring of underlying mandates to be implemented to ensure compliance with their predefined guidelines. The Manager closely monitors underlying manager portfolios and weightings on a daily basis and investigates daily any excess return outliers exceeding the 99% confidence level.

The Fund's investment guidelines, well-defined asset class ranges and limits are well-suited to ensuring the portfolio maintains appropriate diversification.

ESG

Manager Positioning

ESG approach	Risk or Value
Sustainability thematic	Low Carbon or Climate
Responsible investment style	Ethical
Non-financial objective	None

What is the Manager's ESG approach?

The Manager has indicated that their Responsible Investment style is "Ethical". Lonsec highlights that this ESG review is not a measure of how ethical the ultimate portfolio is but is an assessment of the process the Manager undertakes. With a primary ESG style of "Risk or Value" Managers will determine inclusion based on the balance of overall risk (including ESG risk) and potential return. As a result this approach may mean that lower quality ESG companies may be included if the return potential is sufficient and this may conflict with some clients perception of what a strong ESG process would deliver.

Lonsec Opinion & Supporting Facts

Overview

ESG Process Score	ModLow
Responsible Investment strategy risk: Clarity, measurability & reporting	N/A

ESG Snapshot

Product Level Approach

ESG integration assessment for multi asset funds such as this, reviews only the ESG components of the selection underlying strategies or managers, and not the ESG integration of each of the underlying funds or strategies. While the Manager does have some minimum standards for Manager selection and monitoring they are seen by Lonsec as being very light touch. There are no signs that company engagement on ESG issues is a component of the Manager's current investment approach for this Fund.

While ESG does not form a component of the compliance framework, portfolio disclosure is leading.

Strategy: Clarity, Measurability & Reporting

This product does not make any specific claim to being a sustainable, ethical or impact offering. As such Lonsec does not apply its alignment review to the product and thus scores its risk of misalignment as N/A.

Manager Level Approach

The Manager's overall ESG policy framework and disclosure are significantly lagging peers. The Manager has articulated a commitment to the integration of ESG within their investment process, however, there is little evidence in their public positioning. The Manager does not appear to have ESG related policies publicly available, nor has the Manager provided any policy frameworks. No reporting on voting or engagement outcomes is publicly available.

What is the Product Structure?

The Fund is a multi-asset, multi-manager strategy that invests across a range of growth and defensive asset classes via several underlying managers. The Fund is a registered managed investment scheme ('MIS') for which IOOF Investment Services Ltd is the responsible entity (the 'RE'), a related entity. The RE is responsible for operating and managing the MIS, holds an AFSL and as such is required to comply with its AFSL and RE obligations as outlined under the Corporations Act.

Lonsec Opinion

Service Providers

The Manager employs high quality 'tier 1' service providers. The RE has built experience in operating and managing a number of schemes over an extended period of time and is expected to have a governance framework in place to deal with any perceived conflicts of interest.

Operational 'Red Flags'

The multi-manager strategy is not considered to be operationally challenging to implement.

The Fund has recently included allocations to other diversifying assets including private equity and insurance related investments, which are likely to increase the proportion of illiquid assets in the Fund. However, the Manager has appropriate safeguards in place to manage illiquidity risk.

Wind-up Risks

Although the Fund has experienced net outflows over the last 12 months, at current levels of AUM, the wind-down risk of the Fund is considered low.

Lonsec Research is also authorised to deal in a financial product by arranging for another person to apply for, acquire, vary, or dispose the above types of products for or by retail and wholesale clients.

1.4 Provision of general advice

Any advice that Lonsec Research provides is of a general nature and does not take into account your personal financial situation, objectives or needs. You should, before acting on the information, consider its appropriateness having regard to your own financial objectives, situation and needs and if appropriate, obtain personal financial advice on the matter from a financial adviser. Before making a decision regarding any financial product, you should obtain and consider a copy of the relevant Product Disclosure Statement or offer document from the financial product issuer.

1.5 How Lonsec Research is paid

Lonsec Research receives fees from Fund Managers and/or financial product issuers for researching their financial product(s) using comprehensive and objective criteria. Lonsec receives subscriptions fees for providing research content to subscribers including financial advisers, fund managers and financial product issuers. Lonsec Research's fees are not linked to the financial rating outcome of a particular financial product.

Lonsec Research FSG (continued)

Lonsec Research fees are determined by private agreement with its clients depending on a number of criteria including the number of financial advisors who access Lonsec Research publications, the range of publications accessed and the complexity of a specific research assignment. Due to the specific nature of its charges, disclosure of Lonsec Research fees may not be ascertainable when you receive this FSG, but you are able to request this information in writing before a financial service is provided to you. The fees received by Lonsec Research do not have an effect on the inclusion (or otherwise) of a financial product in portfolios managed by Lonsec Investment Solutions; or in approved product lists as a result of Lonsec Investment Solutions consulting activities. We do not have any direct employees as all employees are contracted, for employment purposes, with Lonsec Fiscal, a subsidiary of Lonsec Holdings. All employees of Lonsec are paid a salary and may receive a discretionary bonus which is not guaranteed. Sales employees may have a sales commission plan, relevant for sales to Wholesale clients, as offered by Lonsec Research from time to time at its discretion.

1.6 How do we manage our compensation arrangements?

Lonsec Research has Professional Indemnity insurance arrangements in place to compensate clients for loss or damage because of breaches of any relevant legislative obligations by Lonsec Research or its representatives which satisfy section 912B of the Corporations Act 2001.

1.7 What should you do if you have a complaint?

1.8 Conflicts of Interest

Lonsec Research is aware of the inherent potential conflicts of interest associated with the provision of ratings and how we are remunerated for our services.

There are a comprehensive set of policies, and procedures in place at Lonsec Holdings that apply to its subsidiaries including Lonsec Research. Information barriers (both permanent and temporary) consistent with our regulatory obligations under Regulatory Guide 79 are in place to manage either perceived or actual conflicts of interest. Employees of Lonsec also have to abide by Personal Trading and Gifts and Entertainment requirements and are trained on these requirements from time to time.

Generation Development Group Limited (ACN 087 334 370), a shareholder of Lonsec Holdings, is the parent company of Generation Life Ltd who issue a series of products rated by Lonsec Research. Lonsec Research manages this potential conflict by disclosing to investors accessing our research of Generation Life related products, and implementing our comprehensive ratings process, information barriers and monitoring program. For more information refer to Lonsec Research Ratings Methodology available on our platform iRate or by contacting us on 1300 826 395.

Lonsec Holdings has appointed Australian Retirement Trust Pty Ltd ABN 88 010 720 840, AFSL 228975 as the provider of default superannuation services to its Group employees. Lonsec Holdings appointment of Australian Retirement Trust is not an endorsement of, or opinion on, the Fund.

Australian Retirement Trust is a subscriber to our services and pays a fee to us for this subscription service. Australian Retirement Trust rating and report is issued by an analyst who is aware of Australian Retirement Trust's appointment as default superannuation fund provider but who does not have a personal investment in the fund.
