What this Rating means

The 'Recommended' rating indicates that Lonsec has strong conviction the financial product can generate risk adjusted returns in line with relevant objectives. The financial product is considered an appropriate entry point to this asset class or strategy.

Strengths

- The Trust is managed by an experienced and well-led investment team.
- Increased breadth of resources and tools in particular manager research, asset allocation, performance analytics, governance and implementation teams.
- The Manager implements a robust and consistently applied investment process underpinning underlying manager selection and portfolio construction functions.
- Integration of the broader investment team has been progressing well to further enhance the Manager's investment capabilities.

Weaknesses

- Although the value proposition is strong, the Trust's overall fee load is relatively high in the peer group.

What is this Fund?

- The IOOF MultiMix Cash Enhanced Trust (the 'Trust') is a multi-manager enhanced cash strategy that provides exposure to a diversified portfolio of cash, short-term securities and high-quality interest-bearing securities that are liquid, offer a high degree of income stability and are of relatively high credit quality. The Trust attempts to remain style-neutral whilst providing exposure to a diversified set of low-volatility, income-producing assets managed by domestic cash investment managers. The Trust aims to outperform the Bloomberg AusBond Bank Bill Index (the Benchmark) by 0.45% p.a. (before fees), with a Tracking Error of less than 1% p.a. over a rolling three-year period.
- The Trust is managed by IOOF Investment Services Ltd ('IOOF' or the 'Manager'). IOOF adopts a Multi-Manager investment style, taking an active approach. IOOF's investment philosophy is guided by a number of key principles which have foundations in academic research; active managers can outperform sector benchmarks over the long-term, in-depth research and analysis can provide superior insight and provide the potential for outperformance, and investment style can have a significant impact on performance.
- The Trust's portfolio is divided between the three following underlying strategies:
 - The **IOOF Cash Management Trust** which predominantly invests in high-quality short-term money market and bank-based securities issued or guaranteed by the Commonwealth Government or Rated A-1+, A-1 or A-2 by Standard & Poor's.
 - The **Janus Henderson Conservative Fixed Interest Fund** which primarily invests in a combination of floating rate notes (up to 85%), Australian residential mortgage-backed securities, and will hold a minimum of 15% in cash and short term money market instruments (e.g. certificate of deposits).
 - The **Pendal Short Term Income Fund** which primarily invests 40-80% of the portfolio in floating rate instruments, including corporate bonds, utilities, financials, infrastructure debt securities, asset-backed securities and residential mortgage-backed securities, although this mix is expected to change throughout the market cycle. The remaining 20-60% is invested in cash and money market instruments.
- The Trust's PDS dated 30 June 2022 disclosed Annual Fees and Costs ('AFC') totalling 0.36% p.a. This

value comprises (1) Management Fees and Costs of 0.36% p.a. and (2) Net Transaction Costs of 0.00% p.a. In-line with RG97, some fees and costs have been estimated by the issuer on a reasonable basis. Actual fees and costs may vary from these estimates.

- The Trust charges buy/sell spreads set at 0.02% / 0.03%. These spreads can be subject to change, most notably during periods of market volatility, and can be sourced from the Manager's website.

Using this Fund

This is General Advice only and should be read in conjunction with the Disclaimer, Disclosure and Warning on the final page.

- Lonsec notes that the Manager has produced a Target Market Determination ('TMD') which forms part of its design and distribution arrangements for the Trust. Lonsec has sighted the TMD that has been provided by the Manager and notes that this should be referred to for further details on the Target Market Summary Description of Target Market and Review Triggers.
- Lonsec suggests that the Trust should only be considered for those clients that are seeking yields greater than those available from cash or cash-like instruments (e.g., bank bills) and, more importantly, those prepared to accept low to moderate volatility in the unit price.
- Enhanced Cash and Deposit products are generally able to be liquidated in normal market conditions, although exposure to term deposits and notice accounts may result in delays in processing withdrawals in stressed conditions or if the withdrawal requests exceed the level of securities able to be liquidated overnight.
- Lonsec highlights that the IOOF Cash Management Trust, can hold up to 50% in term deposits and notice accounts in ordinary conditions. While this may heighten the liquidity risk of the Trust, Lonsec takes some comfort that other IOOF-managed trusts are typically the largest investors in the trust (approximately 90%). This affords the Portfolio Manager increased visibility to better forecast and manage the cash flow needs of the trust.

Suggested Lonsec risk profile suitability

For guidance on appropriate asset allocations and risk profiles, refer to the latest Lonsec Strategic Asset Allocation Review and Risk Profile Definitions on our website.

Changes Since Previous Lonsec Review

- Effective July 2022, Dan Farmer was appointed as the Chief Investment Officer ('CIO') for the combined heritage IOOF, MLC and OnePath multi-manager businesses. The investment team is structured with responsibilities broadly segmented by Portfolio Construction, Portfolio Enablement and Special Capabilities functions. A number of team member responsibilities will be transitioned in a measured way over time.
- In June 2022, James Tayler was appointed as Head of Responsible Investment.

ANALYST: ISRIN KHOR | APPROVED BY: ALEC LEUNG

IOOF MultiMix Cash Enhanced Trust

ISSUE DATE 19-04-2023

- In August 2022, Myooran Mahalingam resigned from the Manager and Liam Wilson took over as Portfolio Manager for the MLC Global Equities portfolios, in addition to already being the PM for IOOF and OptiMix Global Equities portfolios.
- There have been additional investment team changes effective 12 September 2022 which include:
 - Paul Crisci departed the Manager and Peter Sumner was appointed as Portfolio Manager for the Australian Equities and A-REIT portfolios;
 - Simon Elimelakh, Head of Investment Portfolio Analytics, transitioned to a contracting role. Furthermore, the analysts previously reporting through to Elimelakh now report to Daniel Ackland, Investment Analytics Manager;
 - David Djukanovic, Head of Exposure Management and Trading, leads a team of 5 including Head of Derivatives (Clifford Bayne) who reports directly to Djukanovic.
- There have been no changes to the underlying manager line-up over the last 12 months.
- In January 2023, Insignia Financial entered into a binding share sale agreement to divest its remaining 45% equity stake in JANA to JANA's management team. JANA would become a wholly management-owned business following the transaction. The completion of this transaction is expected to occur in early 2023. Lonsec notes, no changes in terms of JANA asset consulting services provided to the investment team.

occurring in 2022, Yeo was appointed to Head of Strategy and Equities.

- The Head of Fixed Interest Assets, Osvaldo Acosta is ultimately responsible for the outcomes of the Trust. However, the Trust is managed jointly by Acosta and his primary backup Mark Nordio, Senior Manager (Fixed Interest Assets & Strategy) who possesses 29 years of experience. Acosta and Nordio also have responsibilities for other cash strategies, including the IOOF MultiMix Cash Management Trust. Lonsec considers Acosta and Nordio to be suitably qualified and adept at managing the Trust, exhibiting a high degree of awareness concerning liquidity constraints and seeking out opportunities that offer additional alpha without compromising on quality.
- The team is well-resourced consisting of 46 people in total, including Farmer and Yeo. The investment team has been recently restructured with responsibilities broadly segmented by Portfolio Construction, Portfolio Enablement and Special Capabilities functions. A number of team members' responsibilities will be transitioned in a measured way over time. While the senior team member departures are disappointing, Lonsec believes the reporting lines, roles and responsibilities remain clearly defined under the current structure with team integration progressing well.
- Lonsec views key person risk associated with Acosta as low to moderate given the support and backup structure implemented.
- Lonsec considers the alignment of interest to investors to be moderate. 60% of the remuneration of the investment teams is directly linked to the performance of the multi-manager range of funds, which is heavily weighted to three and five year returns and can be taken as cash, salary sacrifice to superannuation or a combination of the above. The bonuses have a deferral component which promotes further alignment across the team.

Lonsec Opinion of this Fund

People and resources

- Insignia Financial Limited ('Insignia Financial', ASX code: IFL) is a leading provider of wealth management services including superannuation, platform administration and investment management, with over \$285.1bn assets under management and administration as 31 December 2022. Following the completion of the acquisition of MLC Wealth ('MLC') from National Australian Bank (ASX Code: NAB) in May 2021, Lonsec believes there are meaningful synergies realised from the breadth of resources, investment and risk management tools and significant collective industry experience of the combined businesses. The investment team members continue to collaborate effectively to manage their respective products.
- Effective 4 July 2022, Dan Farmer was appointed as the Chief Investment Officer ('CIO') for the combined heritage IOOF, OnePath and MLC multi-manager businesses. Lonsec believes that Farmer possesses the appropriate experience and skillset to lead the team and has skilfully navigated the significant changes arising from the MLC/Insignia Financial Ltd merger. Farmer previously was CIO of the IOOF investment management division and prior to this role, he was the Portfolio Manager for the Australian equities portfolios. Prior to joining the Insignia Financial, Farmer was Senior Executive Investments at Telstra Super. Furthermore, succession planning efforts also saw the appointment of Stanley Yeo as Deputy CIO and Head of Equities in 2021. Moreover and subsequent to the investment team restructure

Research and portfolio construction

- Overall, Lonsec considers the manager research process to be detailed and transparent. The Manager's research process integrates both quantitative and qualitative factors. The quantitative process is used to establish specific risk/return objectives at both the Trust and sector level and also to assist in screening, modelling and identifying managers that in aggregate have the attributes to construct a blended portfolio to meet a specific return and risk target.
- The Manager's research process aims to establish a narrow universe of funds that have been filtered by various criteria including the team's house views on suitable styles of managers for given asset classes. The Manager relies on the services of an external asset consultant, Mercer, when formulating individual strategies, and ad-hoc advice in strategic asset allocation and strategic tilting. Lonsec views Mercer as well-equipped to provide guidance and advice to the team. Combined with the team's sector specialist model, Mercer's MRB has allowed the Manager to undertake research across a broader range of underlying managers and strategies. While Lonsec has a positive view of the depth and breadth of Mercer's domestic and global manager coverage,

ANALYST: ISRIN KHOR | APPROVED BY: ALEC LEUNG

IOOF MultiMix Cash Enhanced Trust

ISSUE DATE 19-04-2023

Lonsec is seeking stability at Mercer following an increased turnover within Mercer's Manager Research Boutique (MRB) over recent years.

- Furthermore, Lonsec notes the investment team also has access to the asset consulting services of JANA. As the broader team integration continues to progress, Lonsec will be better able to assess JANA's input in the Manager's investment process. Lonsec will continue to monitor the team's relationship with JANA in future reviews following the binding share sale agreement to divest Insignia Financial's remaining 45% equity stake in JANA to JANA's management team.
- Pleasingly, the Manager has a well-developed list of designated back-up managers in the event of an adverse scenario eventuating (i.e. key Portfolio Manager departing). Lonsec looks favourably on multi-manager strategies having well-formulated contingency plans, believing it to be consistent with industry 'best practice'.
- The Manager also employs a 'Strategic Tilting' framework whereby occasional deviations from long term SAA are made when the Manager views markets to be at extremes of mispricing. Lonsec is supportive of this approach, believing it may provide a basis for improving the risk/return outcome for investors. Furthermore, Lonsec is encouraged by the Manager introducing dedicated resourcing to the asset allocation process.
- Further complementing the 'Strategic Tilting' framework is the Trust's ability to utilise an "Interest Rate Overlay", which is designed as a risk management strategy to protect the portfolio against credit spread widening during risk-off events in the market. The overlay is implemented via positions in bank bills and exchange-traded bond futures to adjust to an appropriate overall duration of the portfolio best suited for the environment. Lonsec believes that the overlay is a good 'lever' available to the Portfolio Manager to exercise an element of active control over the Trust's duration.

ESG Integration

- Lonsec's ESG integration assessment considers how rigorous, robust and structured the ESG process for the Trust is as well as how well it integrates into the overall investment process and the Manager's overall policy and reporting framework. The assessment is not intended to assess the underlying holdings of the Trust's portfolio or the Manager's adherence to any form of impact, green / sustainable or ethical standards.
- At the corporate level Lonsec views the Manager's overall ESG policy framework and disclosure as behind peers. The Manager has an articulated commitment to the integration of ESG within their investment process with a public positioning and policy framework. The Responsible Investment Position Statement together with proxy voting policy is freely available on the firm's website. The Responsible Investment Position Statement also provides details on engagement practices, however, is considered rather high-level compared to peers. The level of details with respect to the proxy voting policy and voting outcomes is lagging peers. The policy and reporting on voting outcomes lack depth compared to peers.

- The Manager has indicated that their Responsible Investment style is "ESG Integration" and as such that they take Environmental, Social and Governance factors into consideration when assessing investment opportunities. With a primary ESG style of "Stewardship" Managers will usually focus their ESG strategy on Engagement and Voting as the key tool in managing their ESG risks. While stewardship approaches are common across most Managers, they can form the key ESG strategy employed by some Managers. Due to the qualitative nature of this style Lonsec highlights the need for Managers to provide clear and detailed reporting on both engagement and voting activities and recommends investors review the Trust's stewardship reporting where available.
- Lonsec's review of ESG integration for Multi Asset Funds such as this, reviews only the ESG components of the selection of underlying strategies or managers. It does not review the ESG integration at the level of each of the underlying funds or strategies.
- While the Manager does have some minimum standards for Manager selection and monitoring they are seen by Lonsec as being very light touch.
- There are no signs that company engagement on ESG issues is a component of the Manager's current investment approach for this Fund.
- ESG does not form a component of the Managers broader compliance framework and overall transparency provided to investors is lagging.
- In June 2022, James Tayler was appointed as Head of Responsible Investment. Lonsec expects Tayler's appointment to expand the scope of the Manager's ESG integration through time.

Risk management

- Lonsec has been satisfied with the structure of the risk management functions embedded within the investment process. While continually evolving, the Manager has integrated compliance systems that enable underlying mandates to be implemented to ensure compliance with their predefined guidelines.
- Underlying managers are typically accessed via separately managed accounts enabling the Manager to tailor mandates to its requirements, e.g. maximum stock bet limits or maximum cash holdings. Lonsec considers this a positive structure as it can facilitate tighter portfolio construction, better product design control, the opportunity for better pricing, improved tax efficiency for investors and the ability to manage implementation and transitions more efficiently.
- The Manager closely monitors manager portfolios and weightings on a daily basis and investigates daily any excess return outliers exceeding the 99% confidence level. In Lonsec's opinion, ongoing mandate monitoring is very important within the Multi-Manager structure, as it is just as critical for underlying managers to be adhering to their investment process as it is that the process is of high quality.
- The Product Operational Accounting and the Office of the Responsible Entity undertakes operational due diligence on potential investment managers and undertakes annual reviews of the operational risks associated with employed managers. Lonsec views

ANALYST: ISRIN KHOR | APPROVED BY: ALEC LEUNG

IOOF MultiMix Cash Enhanced Trust

this positively as it reduces the workload of Portfolio Managers and improves specialisation.

- The team is continuing to improve the transparency of the underlying portfolios, and have added these portfolios into Bloomberg PORT and FactSet.

Fees

- The Trust's fee comprises a management fee of 0.36% p.a. and net transaction costs of 0.00% p.a. Lonsec considers the total fee load for the Trust (AFC of 0.36% p.a.) to represent a higher cost offering.

Product

- The Trust is a relatively vanilla enhanced cash multi-manager strategy. Hence, Lonsec does not consider it to be operationally challenging to implement. Additionally, the Manager employs high-quality 'tier 1' service providers.
- The Fund is a registered managed investment scheme ('MIS') for which IOOF Investment Services Ltd ('IOOF'), the Responsible Entity ('RE'), is a related entity. The RE is responsible for operating and managing the MIS, holds an AFSL and as such is required to comply with its AFSL and RE obligations as outlined under the Corporations Act. Lonsec notes the RE has built experience in operating and managing a number of schemes over an extended period of time and is expected to have a governance framework in place to deal with any perceived conflicts of interest.
- The Trust has been in outflow over the short-to-medium term which heightens the potential for wind-up risk if this trend was to materially accelerate. That said, Lonsec acknowledges that the Trust is already large scale with the Manager remaining fully committed to this product.

Performance

- The Trust's internal return objective is to outperform the Bloomberg AusBond Bank Bill Index by 0.45% p.a. (before fees) over rolling three-year periods.
- As at 28 February 2023, the Trust delivered a total return (net of fees) of 1.0% p.a., and 1.3% p.a. over the three and five years respectively which was broadly in line with peers. The Trust has outperformed the benchmark but did not meet its internal objective over both periods.
- The Trust's volatility (as measured by the annualised standard deviation) and drawdowns were smaller than the peer median over three and five-year periods.
- The Trust's returns and annualised standard deviation have resulted in a Sharpe Ratio that was higher across the three and five-year periods.

Overall

- Lonsec has maintained the Trust's 'Recommended' rating at its recent review. The rating reflects the high regard and conviction for the experience and calibre of the broader investment team. Further, lead Portfolio Manager, Osvaldo Acosta is considered sufficiently skilled and experienced to manage the Trust effectively. The rating is also underpinned by Lonsec's positive view of the Trust's robust and repeatable investment process. The increased resourcing from the combined heritage IOOF, OnePath and MLC businesses, provides further depth of expertise within investment management, asset allocation and risk management.
- Lonsec notes the Trust's overall fee load is considered high.

People and Resources

Corporate overview

Insignia Financial Ltd ('Insignia Financial') is a wealth management company offering products and services across, financial advice and distribution, portfolio and estate administration, and investment management.

Insignia Financial is listed on the Australian Stock Exchange ('ASX'). As of 31 December 2022, Insignia Financial had \$285.1bn in Funds Under Management and Administration.

These services are operated through a suite of brands including IOOF, Shadforth, Lonsdale, Bridges Financial Services, Consultum Financial Advisers, M3 Financial Services and RI Advice.

Size and experience

NAME	POSITION	EXPERIENCE	
		INDUSTRY /	FIRM
DANIEL FARMER	CIO	27 /	13
OSVALDO ACOSTA	HEAD OF FIXED INTEREST ASSETS	22 /	6
MARK NORDIO	SENIOR MANAGER - FIXED INTEREST AND STRATEGY	29 /	4

The Investment Team is structured along specialist lines. Osvaldo Acosta joined IOOF in December 2016. Acosta possesses 22 years of experience within fixed income and capital markets across a number of roles. Most recently he worked at Western Asset Management where he was part of the team responsible for portfolio management, trading, and implementation of interest rate strategies across a variety of fixed income portfolios. Prior to that he oversaw multi-manager style portfolios at Australian Unity Investments and was a Treasury Manager at Westfield Group. Acosta's primary backup is Senior Manager (Fixed Interest Assets & Strategy), Mark Nordio who possesses 29 years of experience. Nordio joined from CommInsure in August 2019 where he was a Senior Analyst for their Multi-Manager Fixed Income Strategies. Nordio previously worked at Barclays Global Investors, Blackrock, and Antares Fixed Income.

In total, the investment team consists of 46 personnel across several specialised asset classes and functions. The senior members of the investment team comprise an average of 25 years of industry experience. The Team is led by CIO, Dan Farmer and includes 10 Heads of

IOOF MultiMix Cash Enhanced Trust

ISSUE DATE 19-04-2023

Asset Classes and Implementation, with additional support from approximately 35 Portfolio Managers and supporting analysts.

The Portfolio Manager conducts qualitative and quantitative research and provides overall data support and recommendations to the five-member Investment Management Committee ('IMC'). The IMC ultimately considers and approves asset allocation decisions and manager appointments.

The IMC meets bi-monthly or more frequently if required, and comprises Anthony Hodges (Chairman and External Member), Denise Allen, and Mary-Anne Nunan (External Members), Daniel Farmer (Executive Member and CIO), and Stanley Yeo (Executive Member and Head of Strategy and Equities). Osvaldo Acosta (Head of Fixed Interest Assets) has been appointed as Secretary.

Back-office functions are performed by IOOF's Investment Operations Team. Compliance monitoring, custody, unit pricing, registry, and financial reporting functions are outsourced to various parties including Insignia Financial and JP Morgan; while transition management and implementation are performed by a panel of transition managers including Citi, Macquarie, UBS, and State Street.

Remuneration

The investment team is rewarded with a combination of base salary and variable bonus. Remuneration of the investment teams is directly linked to the performance of the multi-manager range of funds. Typically, 60% of a team member's variable remuneration is linked to the performance of the funds with 20% linked to broader product development initiatives and the remaining 20% related to behaviours and risk metrics. Variable remuneration is heavily weighted to longer term performance, with 85% based on three and five year returns, and can be taken as cash, salary sacrifice to superannuation or a combination of the above.

Asset Consultant

IOOF appointed Mercer as its primary external asset consultant in July 2017 and MLC has a long standing relationship with JANA (JANA was previously a fully owned subsidiary of NAB. Insignia Financial Ltd sold its remaining minority share to JANA in January 2023). Post IOOF's acquisition of MLC, the broader Insignia Financial multi manager business benefit from consultancy and research services provided by both Mercer and JANA.

These services include manager research and consultancy services when performing due diligence on prospective and currently appointed underlying managers, designing neutral benchmarks, stress testing, strategic tilting advice and performing various other risk management functions. In addition to Mercer and JANA, Neuberger Berman assists in Alternative's research. Neuberger Berman is an 80-year old private employee-owned investment manager. The firm manages equities, fixed income, private equity and hedge fund portfolios for institutions and advisors. With offices in 36 cities worldwide, Neuberger Berman's team employs more than 2,400 professionals and manages more than US\$402bn in assets under management as at December 2021.

Research Approach

Overview

A structured investment process is employed:

- Macroeconomic research and yield curve analysis to determine the likelihood of short-term activity from the RBA.
- Developing the investment strategy in terms of both duration and security selection.
- Portfolio construction in the context of the Trust's risk and return objective.
- Monitoring to ensure compliance with the investment parameters.

Screening of Managers

IOOF places a strong emphasis on active risk budgeting when in the Portfolio Construction process, and therefore identifies the type of managers/mandates required to fulfill particular roles within the available tracking error budget. As such, managers who would be unlikely to fulfill a certain role within the portfolio will be screened out. This approach allows IOOF to minimize the universe of products to a manageable size rather than considering all available managers in each asset class. For example, IOOF's house view on Australian equities is that well-resourced active managers, with a strong alignment of interest between investment staff and investors with relatively low funds under management, are most likely to outperform, and so will dedicate the research effort to these types of managers as opposed to the entire Australian equity universe.

IOOF also has access to Mercer's Global Investment Manager Database ('GIMD') to enhance the scope of their research capability and as an additional tool for filtering to identify the most suitable funds. GIMD is an online database that encapsulates information ranging from manager research notes, historical performance statistics, ideas emerging in other markets, and economic research on approximately 5,300 managers and 26,000 funds.

Typically, IOOF will focus its research on managers rated B+ or higher by Mercer. However, the discovery of managers may be sourced through any source including Mercer, directly by IOOF, through existing networks and contacts with other industry participants, such as managers, consultants or superannuation plan operators. The IOOF investment team are encouraged to have a wide opportunity set for investment ideas.

Research focus

The list of potential managers identified as research priorities by the screening process will then be subject to additional research by the IOOF team before they can be included in a portfolio. This 'double' layer of manager research typically ensures that final funds in the portfolios have undergone a rigorous review process.

IOOF undertakes a mix of both qualitative and quantitative research. From a qualitative perspective, IOOF considers factors such as the firm's background and history, financial position, the calibre of key decision-makers and the depth of available resources, investment strategy and style, idea generation and portfolio construction processes, and implementation constraints. The types of quantitative analysis conducted will include various types of performance, return

and style-based analytics, various types of portfolio holdings-based attribution, and risk factor analytics.

Portfolio Construction

Overview

INVESTMENT PHILOSOPHY	INVESTORS ARE ABLE TO ACHIEVE MODEST RETURNS WHILST ASSUMING MINIMAL RISK BY ADOPTING A DEFENSIVE INVESTMENT STRATEGY
RETURN OBJECTIVE (INTERNAL)	TO OUTPERFORM THE BENCHMARK BY 0.45% P.A. (BEFORE FEES) OVER THREE YEARS.
TRUST BENCHMARK	BLOOMBERG AUSBOND BANK BILL INDEX
SUB-INVESTMENT GRADE	NOT PERMITTED
TYPICAL NUMBER OF ISSUERS	50-75
TYPICAL NUMBER OF SECURITIES	90-110

IOOF's primary objective with respect to the determination of manager weightings is to achieve a style-neutral portfolio free from any undesired systematic style, capitalisation, or other factor biases relative to the relevant benchmark. Manager weightings are also determined via an assessment of contribution to total active risk to ensure no one manager has a disproportionate expected contribution. However, a manager's contribution to total active risk is not considered in isolation but with reference to the correlation of its excess returns with other managers and the objective of the product.

To summarise the actual portfolio construction process, in the first instance, active risk and return targets are set for the Trust's risk profile. The tracking error or risk budget is then apportioned between allowable asset classes based on IOOF's house views of the available risks and opportunities. Finally, managers are selected and blended to fill the risk budget, with each manager's contribution to risk being commensurate with their expected contribution to the alpha target. The number and style of managers within each asset class are also pre-determined according to IOOF's house view.

Manager blending is conducted following both qualitative and quantitative assessments. The qualitative analysis includes a comparative analysis of each manager, and the diversification benefits they offer. Quantitative analysis includes factors such as correlation, historical returns, style biases, capitalisation analysis, regression analysis, and various risk analytics.

Prior to submitting a manager recommendation to the IMC, the recommendation is peer-reviewed by the Investment Manager Peer Review Group. This group consists of senior investment professionals (Chief Investment Officer and Portfolio Managers) that are ultimately responsible for the review of manager proposals before being formally considered by the IMC. This ensures any manager proposal to the IMC has been rigorously peer-reviewed as a means of quality control and to minimise individual bias and subjectivity. It is also a means to consider the manager's proposal in a total portfolio context.

The following summarises the underlying managers within the Trust as of 31 December 2022.

- The **IOOF Cash Management Trust** aims to outperform the returns of the Bloomberg AusBond Bank Bill Index by 0.30% p.a. (before fees) over a rolling one-year period. It predominantly invests in high-quality short-term money market and bank-based securities issued or guaranteed by the

Commonwealth Government or Rated A-1+, A-1 or A-2 by Standard & Poor's. Typical securities held include floating rate notes ('FRNs'), negotiable certificates of deposits ('NCDs'), commercial paper ('CPs'), term deposits, notice accounts and overnight cash.

- The allocation to the **Janus Henderson Conservative Fixed Interest Fund** aims to outperform the Bloomberg AusBond Bank Bill Index by 0.50% p.a. (before fees) over rolling three-year periods. It will primarily invest in a combination of floating rate notes (up to 85%), Australian residential mortgage-backed securities, and will hold a minimum of 15% in cash and short term money market instruments (e.g. certificate of deposits). The mandate has an explicit duration limit of -0.75 to +1.25 years (absolute) relative to the Bloomberg AusBond Bank Bill Index as well as a restriction on investing in hybrid securities.
- The **Pendal Short Term Income Fund** aims to provide a return (before fees, costs and taxes) that exceeds the Bloomberg AusBond Bank Bill index by 0.5% p.a. over rolling three-year periods. It will primarily invest 40-80% of the portfolio in floating rate instruments, including corporate bonds, utilities, financials, infrastructure debt securities, asset-backed securities and residential mortgage-backed securities, although this mix is expected to change throughout the market cycle. The remaining 20-60% is invested in cash and money market instruments.

Risk Management

Risk limits

MIN. CREDIT QUALITY AT PURCHASE	A3/BBB-
MAX. PORTFOLIO WEIGHT TO ANY ONE ISSUER	DEPENDENT ON CREDIT RATING
DURATION RISK LIMIT	-/+ 0.50 YEARS (BENCHMARK RELATIVE)
TRACKING ERROR TARGET	< 1.0% OVER THREE YEARS
CURRENCY EXPOSURE	FULLY HEDGED

All underlying managers are subject to constraints as specified in an investment management agreement. Most underlying managers are accessed via separately managed accounts. This enables IOOF to tailor mandates to its requirements, for example, maximum stock exposure limits or maximum cash holdings.

The risk tools employed by IOOF include Bloomberg, Factset, and BARRA. Risk analysis is also completed by Mercer, whenever a change to the portfolio is proposed.

Risk monitoring

The IOOF investment manager monitoring process consists of a number of prescribed stages. This includes the review of monthly investment reports, review of quarterly manager questionnaires, formal quarterly manager interviews, quarterly manager review notes, ongoing quantitative performance analytics, and ongoing review of external research. Quarterly Manager Questionnaires cover not only risk and performance but also any changes or developments in people or processes. Formal manager interviews (and site visits where practical) are also conducted on an ad-hoc basis where required.

Manager weightings are monitored on a daily basis and are rebalanced on an ongoing basis using

IOOF MultiMix Cash Enhanced Trust

cashflows. Using cashflows in this way means that active rebalancing of the portfolio is rarely required which minimises turnover and transaction costs/tax implications.

Product Operational Accounting and the Office of the Responsible Entity works with the Investment Team to review and assess the operational capabilities of all manager appointments.

This team also monitors, reviews and assesses the operational risks associated with employed Investment Managers on an annual basis.

Operational due diligence includes a review of the systems, policies, processes and resources managers have in place to monitor and manage operational risk exposures. Reviews typically focus on the below areas:

- Professional indemnity insurance
- Auditing Practices (with reference to GS007 requirements)
- Organisational structures
- Business Continuity Management
- Policy Summaries
- Risk Management Approaches
- Investment Compliance
- Breaches & Incidents

Implementation

Portfolio allocations are monitored daily and re-balanced as necessary (subject to a tolerance range of +/-3% at the asset class level and +/-5% at the manager level). Cashflows are actively used to rebalance the portfolio on an ongoing basis, so the tolerance bands are rarely breached. Cashflows are allocated using a proprietary cashflow management system which allows for straight through processing to underlying investment managers.

External transition managers are appointed from a panel at 'arm's length' to ensure that objectivity is maintained. Custody, unit pricing, registry and financial reporting functions are outsourced to various parties including IOOF and JP Morgan.

Currency Management

The Manager has discretion in what portion of its underlying portfolio will be hedged back to the Australian Dollar. Consequently, returns will often be partially affected by movements in the Australian Dollar versus other currencies globally.

Currency hedging will typically take place within the underlying mandates, as opposed to a currency hedging overlay on the aggregate portfolio.

Risks

An investment in the Trust carries a number of standard investment risks associated with investment markets. These include economic, market, political, legal, tax and regulatory risks. Investors should read the PDS before making a decision to invest or not invest. Lonsec considers the major risks to be:

Interest rate risk

The Trust is exposed to movements in short term interest rates.

Credit risk

The risk that an issuer of debt securities fails to meet its obligations. This creates exposure to underlying

borrowers and the financial condition of issuers of these securities. The Trust is not permitted to hold sub investment grade debt.

Derivatives risk

Derivatives in the Trust may be used for more efficient and cost-effective implementation of investment strategies. IOOF does not intend to leverage the Trust.

Liquidity risk

If a security cannot be bought or sold quickly enough to reduce or minimise a potential loss, the Trust may experience difficulty satisfying commitments associated with financial instruments.

Other risks

Please refer to the Trust's PDS for more details on items identified by the Responsible Entity and Manager including Liquidity Risk, Counterparty Risk, Legal and Regulatory Risk.

Glossary

Total return ‘Top line’ actual return, after fees
Excess return Return in excess of the benchmark return
Standard deviation Volatility of monthly Absolute Returns
Tracking error Volatility of monthly Excess Returns against the benchmark (the Standard Deviation of monthly Excess Returns)
Sharpe ratio Absolute reward for absolute risk taken (outperformance of the risk free return (Bank Bills) / Standard Deviation)
Information ratio Relative reward for relative risk taken (Excess Returns / Tracking Error)
Worst drawdown The worst cumulative loss (‘peak to trough’) experienced over the period assessed
Time to recovery The number of months taken to recover the Worst Drawdown
Snail Trail A trailing 12-month relative performance and relative risk measurement over the benchmark. The trail is generated using a 12-month rolling window over the specified period

About Lonsec

Lonsec Research Pty Ltd (Lonsec) is an investment research house with specialist areas of expertise, that was originally established in 1994 and the current entity was registered on 23 June 2011. From 1 July 2011, Lonsec became a fully owned subsidiary of Lonsec Fiscal Holdings Pty Ltd, a privately owned entity with a multi-brand strategy of providing leading financial services research and investment execution. Lonsec believes that professional financial advisers need informed opinions on the best investment strategies and financial products to provide real value for their clients. To meet this need, Lonsec has in place an experienced research team, which draws on a robust research process to undertake in-depth assessment of managed fund products.

Analyst Disclosure and Certification

Analyst remuneration is not linked to the research or rating outcome. Where financial products are mentioned, the Analyst(s) may hold the financial product(s) referred to in this document, but Lonsec considers such holdings not to be sufficiently material to compromise the rating or advice. Analyst holdings may change during the life of this document. The Analyst(s) certify that the views expressed in this document accurately reflect their personal, professional opinion about the matters and financial product(s) to which this document refers.
